

Computer and Information Technology Department (CITD)

This department equipped with high tech lab with modern instrument. Different types of Routing technology, Hub, Switch, Cable, Network Hardware, Practical Equipment, Working Box, Maintenance materials etc. Varieties of Motherboard, Monitor, Processor, RAM, HDD, SSD etc. are available for practical classes.

Trainees get an opportunity to acquire real applicable knowledge and hands on practice facility in closed contact theoretical & practical session. Practice on Hardware Maintenance, Main Board Fabrication, Cable manufacturing, Network topology, IP configuration, Network Troubleshooting etc increase their confidence and working capability.

Advanced Computer Lab

This laboratory is well fabricated on different switching and power management. The topology is designed to show to the extent on account of trainee's hands-on learning.

Laptop, Desktop, Network materials, Monitor, Projector etc. is using to made the lab easier student getting comfortable learning.
